The Goals of the Public Works Department (PWD) Snow Control Operations:

- To provide cost effective clearing and removal of snow from Town streets.
- Minimize the hazards of slippery road conditions encountered by motorists.

- Reduce economic losses caused by workers unable to get to their job.
- To restore traveling conditions throughout the Town as soon as possible after each storm event.

This informational brochure provides a general overview of our snow program, frequently asked questions, winter tips, and seeks your support in providing safe streets and sidewalks during snow emergencies.

The Public Works Department maintains roughly nine miles of roadway in the winter season snow removal and road operations. The PWD plows roughly four miles of sidewalk to ensure safe passage for pedestrians.

The PWD has available two sanders utilized to de-ice the roadways. When conditions warrant the plowing of roadways the PWD uses municipal vehicles and a tractor with an auger in order to make our streets safe.

Many factors can determine the PWD's response to a snow event, some of which may include:

- The temperature before, during, and after the storm.
- The amount of accumulated snow.
- The duration of the storm.
- The road surface temperature.
- The weather forecast for the following day(s).

Plan of Operations:

- 1) When the snow starts falling road de-icing equipment are dispatched to apply materials to keep the road safe. The materials can include sand and road salt.
- 2) When two inches of snow has accumulated on the streets, a snow plowing operation usually begins.
- 3) Once the snow stops falling and the roads have been plowed the streets will again be treated with de-icing materials to prevent a "freeze-up" of the road surface.
- 4) PWD personnel will then perform a clean-up effort of clearing intersections, plowing sidewalks, and parking lots.

Winter Parking Prohibition:

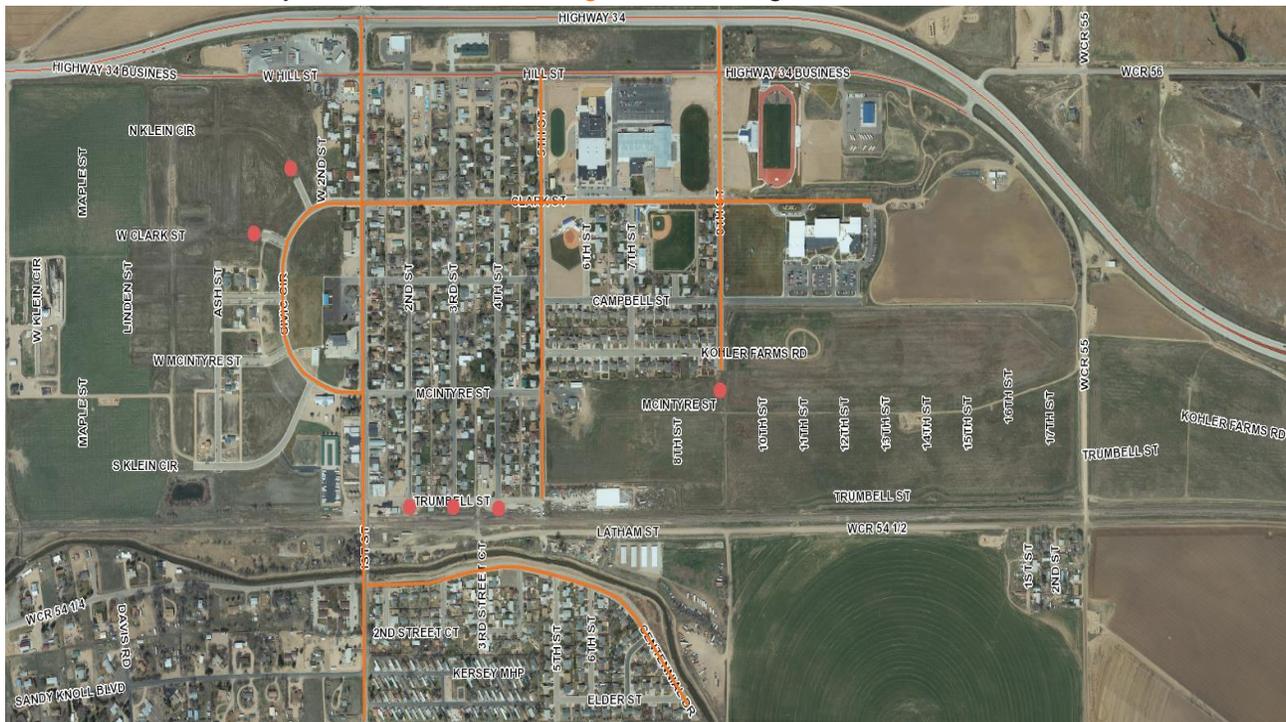

Parked vehicles are the biggest obstacles to effective snow removal. Please support our efforts by parking your vehicle in conformance with the winter parking prohibition. The Public Works Department is asking residents when snow warnings are issued, please keep vehicles off the street to expedite plowing operations, allowing for the prevention of damage to private vehicles.

- Overnight parking is requested not to be on public streets labeled in orange, below, from the hours of 02:00 A.M. and 06:00 A.M. from November 1st to April 1st.

- The Chief of Police may also declare a parking prohibition if a significant snow event is forecast or in progress.
- Residents are asked to remove vehicles from the street when a snowstorm is occurring. It makes plowing safer and more efficient if plow drivers do not have to operate around parked vehicles.

Snow Plowing and Piling Map:

Priority streets shown in **orange**. Snow Piling locations in **red circles**.

All streets with the exception of those listed below shall be plowed to the sides of the roadway.

Streets plowed to the **CENTER** include:

- 1) Campbell (between 1st and 5th)
- 2) McIntyre (between 1st and 5th)
- 3) Second Street (between Hill and Trumbull)
- 4) Third Street (between Hill and Trumbull)
- 5) Fourth Street (between Hill and Trumbull)

In all cases, the Public Works Operations Manager or the Public Works Director is in charge of the actual plowing operations. They shall have the discretion to make changes to the plowing plan based on safety or extraordinary circumstances.

In the event extreme conditions require additional assistance with snow removal, the Town has budgeted for services through a contractor.

In the event useful community service is assigned by the Municipal Judge, this service shall be completed in the winter months assisting with snow removal. These assignments shall be at the discretion of the Public Works Manager or the Public Works Director in charge of plowing operations.

Sidewalk Clearing:

Residents are reminded the Town Ordinance states it is the responsibility of the owners and occupants of buildings and vacant lots to remove your snow, sleet, and ice from public sidewalks abutting to their property within 24 hours after the storm has concluded. This includes clearing areas for access to school bus stops and clearing paths at corners to access the roads. Failure to comply with this ordinance may result in a fine. If you have difficulty with properties that have unshoveled sidewalks, you can report these to the Public Works Department at (970) 353-1681.

Please remember the final snow plow pass is not made until after the storm has concluded. Your cooperation in clearing the sidewalks is an essential safety measure for school children, the elderly, and other pedestrians using the sidewalks.

Town Ordinance Section 8-43. Parking Prohibited After Snowfall Accumulation:

- A. Upon the occurrence of a snowfall resulting in accumulation of two (2) inches or more, parking shall be prohibited on the following public roadways within the Town of Kersey:
- 1) First Street (aka Main Street or CR 53) between Hwy 34 and CR 54 (section line),
 - 2) Fifth Street between Hill Street and Trumbull Street
 - 3) Ninth Street between Hill Street and Kohler Farms Road
 - 4) Clark Street between First Street and Ninth Street
 - 5) Centennial Drive between First Street and Elder Street
 - 6) Civic Circle between Clark Street and McIntyre Street

Any vehicle, except an emergency vehicle, found parked in the designated area shall be towed or otherwise removed from the area by the Town, without delay and at the owner's expense.

- B. In addition to the costs incurred for the towing or removal of the vehicle pursuant to this Section, the owner of any vehicle parked in violation of this Section shall be in violation of provisions of this Section and subject to the jurisdiction of the Municipal Court and the penalty provisions of this Code.
- C. The Town Manager is hereby authorized to oversee the development and placement of appropriate street signs to inform the public of the restrictions set forth in this Section and to oversee the development and adoption of such rules and regulations as may be deemed necessary to effectuate and carry out the intent of this Section.

Sec. 11-1. Obstructing sidewalks; snow removal; required within certain time.

It shall be the duty of all persons, whether owners or not, within the corporate limits of the Town to keep the sidewalks in front of and adjacent to the tenements and grounds occupied by them clear of snow and ice; and after fall of such snow, such persons shall remove the same from such sidewalks within twenty-four (24) hours after the termination of each such snowfall. It shall be unlawful for any person to drag, shovel or deposit any snow that has been removed from private property upon any street, gutter or sidewalk or upon any other public ground or place in the Town except in an area which has been designated for such a deposit of snow. Said designation shall occur by Board of Trustee resolution which shall be published once in a newspaper of general circulation subsequent to its passage. (Ord. 120 §1, 1976)

Sec. 11-2. Persons responsible for snow removal in multiple occupancy buildings.

Wherever houses or other buildings shall be occupied by several tenants, it shall be the duty of the persons occupying the story or stories nearest such sidewalks to clean snow and ice from the same. Where the basement of any building shall reach below the level of the ground, the second story shall be deemed nearest the sidewalk and such basement or first story shall be responsible if there are no tenants in the second story; provided that no occupant shall be required to keep clear any such sidewalk for a greater number of feet than may be contiguous or opposite to any premises or part of premises actually occupied by that tenant. (Ord. 120 §2, 1976)

Sec. 11-3. Person responsible for vacant property.

- A. Where any premises or parts of premises are not occupied in any manner, it shall be the duty of the owner thereof to comply with the requirements of Sections 11-1 and 11-2 above.
- B. In the event the owner of any such premises so unoccupied shall be a nonresident of the Town or absent from the Town, that owner shall appoint a resident agent who shall have charge of such premises and shall comply with the requirements imposed in Sections 11-1 and 11-2 above. (Ord. 120 §3, 1976)

School Closings or Delayed Openings:

Information regarding school closings and delays may be reported to the following sources:

- Platte Valley School District's Website: www.plattevalley.k12.co.us/
- Platte Valley School District's Facebook Page: www.facebook.com/pvRE7/
- Town's website: www.kerseygov.com/

- Denver 7 News: www.thedenverchannel.com/
- 9News: www.9news.com/
- KDVR: kdvr.com/
-

Fire Hydrants:

Owners of property and occupants of buildings that have a fire hydrant are requested by the Town to clear a four-foot area in all directions around the hydrant and a three-foot wide path from the street to the fire hydrant. The Fire Protection District counts on hydrants being cleared of snow to help protect your safety.

Catch Basins and Storm Inlets:

Help minimize street flooding by shoveling snow and ice from in front of the storm inlet nearest your house. This includes keeping catch basin grates free of leaves and other debris all year long!

Driveway Clearing Tips:

The following suggestions are intended to make your driveway snow removal easier and safer:

- If possible, wait until the road has been completely plowed to the curb before shoveling the last 5-10 feet of your driveway. This way less snow from the road will end up in your driveway.
- It is best to place snow on the far side of your driveway, away from the direction the plow is traveling. In most cases, this means placing the snow on the right side of your driveway as you face the road. This way the plow will carry the snow away from your driveway, rather than back into it.
- **Do NOT shovel, blow, or plow snow from your driveway into or across the road.** It is a violation of Town Ordinances to push snow into the street, and you may be held liable if this snow causes an accident. **Remember, you are also responsible for the actions of your contractor!**
- Do NOT allow children to play on snow prohibition along the side of the road. The Town may need to push back snow prohibition days after a storm to create room for the next snow event.

Winter Driving Checklist and Tips:

- Keep good, all-season tires on your car.
- Keep a shovel and some sand in your trunk.
- Clean your vehicle of all snow and ice, including the roof.
- Allow extra time to reach your destination. During storms, travel only when absolutely necessary.
- Keep a safe distance from plow trucks and other vehicles.

Potholes:

Potholes are formed when water seeps into cracks in the pavement surface and the continual freeze-thaw cycle in the early spring moves the surface of the pavement. This movement weakens the

pavement. Traffic loosens the pavement even more, and it eventually crumbles and pops out. The pounding of tires wears a hole in the underlying gravel, and a pothole is formed.

During the weeks leading up to the winter season, Town crews make pavement repairs to help minimize the formation of potholes during the winter. The patching of potholes continues throughout the winter. During cold weather, temporary repairs are made with cold patch asphalt because the weather is too cold to use hot asphalt. During warmer temperatures, hot asphalt is used for more permanent repairs.

Unfortunately, during periods where the weather fluctuates from freezing to warm temperatures, the formation of potholes is unavoidable. Spring temperatures warm the cold pavement, melting and evaporating any frozen water. This creates air pockets that can eventually cause the pavement to break up. A winter of heavy snow or rain and several freeze-thaw cycles can mean a big pothole season ahead.

If you see a pothole in need of repair, please call the Town's Public Works Department at (970) 356-5675 or email the Public Works Operations Manager Josh Roseberry at [www.jroseberry@kerseygov.com](mailto:jroseberry@kerseygov.com)

To help expedite our response, please provide us with some specific information:

- The exact location
- Size (approximate length/width/depth)
- Is the hole on the sidewalk or roadway (driving lane or parking lane)?
- Is there a barricade or orange cone over this hole?

The more information we have, the better we can serve you.

Potholes on most heavily traveled roads are usually repaired within 48 to 72 hours of notification. Maintenance crews are constantly on the lookout for potholes but, we welcome citizen calls about potholes as well. The sooner the pothole is reported, the quicker the Public Works Department can remove that road hazard.

Portable Basketball Hoops:

Residents are reminded that portable basketball hoops should NOT be in the Town Right-of-Way. The Town is not responsible for damage done by plows to basketball hoops left in the Town Right-of-Way. You could be fined and may also be liable for damage done to vehicles and/or personal injury claims from placement of hoops on Town property.

Street Sweeping:

The Public Works Department generally begins the Street Sweeping program around the last week of March, weather permitting. Residents can assist us in the following ways:

- Limit parking on the street until your street has been swept.
- Keep leaves, branches, rocks, and other debris out of the street. This may cause damage to the sweeper and delay the program.

- Do NOT sweep sand or other debris into catch basins and storm inlets.

Dos and Don'ts:

Please Don't:

- Please don't plow snow from your property into the street. This not only increases the Town's cost for snow plowing but, increases your liability if an accident occurs.
- Please don't throw snow from your driveway or sidewalk into the street.
- Please don't place rocks or large objects on the road edge. This may cause plow damage, vehicle damage, or operator injury.

Please Do:

- In the interest of your neighbor's and your own personal safety, please shovel out nearby hydrants.
- Please keep nearby catch basins clear of snow or ice to prevent street flooding during heavy rains or snow melting periods.

FAQ's (Frequently Asked Questions):

Question: Why do you wait to plow the snow off the streets?

Answer: After applying road de-icing sand and salt, the PWD waits for the salt to react with the snow to create a "brine" solution. This reaction time depends on a number of variables (i.e. traffic flow, temperature, etc.). The "brine" solution keeps the snow from adhering to the street and helps the snow plowing effort.

Question: Do some streets receive priority during the snow storm?

Answer: Yes. Major (arterial) roads and hills are a top priority, followed by service to the arterial collector roads. Please refer to page four for the Snow Plowing Map; all of the streets in orange are the first priority.

Question: Do the sidewalks receive the same priority as the streets?

Answer: No. The roads are a priority for public safety reasons. Only highly traveled and school related sidewalks are plowed when the storm has ended.

Question: Why is snow pushed into my driveway?

Answer: This situation is unavoidable. The plows remove as much snow as possible to allow for maximum clearance of the roadway and to allow for mail delivery.

Question: Why does my street always seem like it's the last one plowed?

Answer: Traffic volume is the determining factor for order in snow removal operations. You may feel like your street is the last to be plowed. However, our main objective is to make the road safe for all drivers during snowstorms. Please be patient.

Question: Who determines the opening, closing, or delayed opening of schools during a snow storm?

Answer: The School District.

Contact Information Regarding Snow Questions:

- For further information or suggestions on the Snow Operations Policy for the Town please call or email Josh Roseberry, Public Works Operations Manager at: (970) 356-5675 or email him at: jroseberry@kerseygov
- Difficulties with properties that have unshoveled sidewalks, same as above.
- For snow deposits on the street causing a hazard: Police Department (970) 353-1681

The Public Works Department would like to wish you a safe and enjoyable winter season.
